

To add your .png logo to your jewelry images

In Photoshop

- Open your jewelry image (the target)
- Open one of your logo files (these are .png files)
- While in the logo file, select the logo (Ctrl+A)
- Copy the logo file (Ctrl+C)
- Go to the jewelry image
- Paste the logo file (Ctrl+V) onto the jewelry image
- Free transform (Ctrl+T) to change size and location at same time
 - Shift+drag to retain proportions while resizing
 - Then relocate using the mouse to drag to desired location
 - Apply changes (hit “enter”)
 - To resize and relocate as separate actions:
 - Resize (Edit -> Transform -> Scale... hold shift key while scaling to retain proportion... hit “enter” to apply change)
 - Move (photoshop = “move tool” from tool box)
- Change transparency if desired (in LAYERS, “fill” option)
- Save file (can flatten layers first if desired)

In Photoshop Elements 13

- Open your jewelry image (the target)
- Open one of your logo files (these are .png files)
- While in the logo file, select the logo (Ctrl+A)
- Copy the logo file (Ctrl+C)
- Go to the jewelry image
- Paste the logo file (Ctrl+V) onto the jewelry image
- CTRL+T (free transform) to relocate/move the logo
 - Mouse on corner to resize
 - To retain proportions use no function keys
 - Mouse to grab and move logo to new location
 - End “free transform” by clicking green check mark
- Change logo opacity in “opacity” option of layers menu
- Save file (can flatten layers first if desired)

In GIMP

- Open your jewelry image (the target)
- Open one of your logo files (these are .png files)
- While in the logo file, select the logo (Ctrl+A)
- Copy the logo file (Ctrl+C)
- Go to the jewelry image
- Paste the logo file (Ctrl+V) onto the jewelry image
- Scale image (changing size) using toolbox icon 
 - Retaining proportion by holding **CTRL** while dragging mouse
 - Click “scale” (not “enter”) to apply change
- Move image using toolbox icon 
 - Make sure “Move the active layer” is selected in the Tool Options
- Change transparency using eraser tool with opacity selection 
- Flatten layers from the menu bar by clicking Image → Flatten Image
- To save as jpg, png, tif, etc click from menu bar: File → Export As
 - Use pull down to select your image format preference, title the file, and choose location for saving
